- Under Cookies and website data, Click "Remove All Website Data. Note: You can also choose to remove all cookies except ones from Apple, your internet service provider and banks.
- 5. Quit Safari. Relaunch Safari holding the Shift key down.

6. Safari > Preferences > Search > Smart Search Field > Enable Quick Website Search

7. Click the "Manage Websites" button. Click "Remove All" button and then "Done".

## Clear the history and cookies from Safari on your iPhone, iPad, or iPod touch

Here's how to clear information from your device:

- To clear your history and cookies, go to Settings > Safari, and tap Clear History and Website Data. Clearing your history, cookies, and browsing data from Safari won't change your AutoFill information.
- To clear your cookies and keep your history, go to Settings > Safari > Advanced > Website Data, then tap Remove All Website Data.
- To visit sites without leaving a history, turn private browsing on or off.

When there's no history or website data to clear, the setting turns gray. The setting might also be gray if you have web content restrictions set up under Content & Privacy Restrictions in Screen Time.

May look slightly different depending on OS version.
